Our Commitment to Quality and Craftsmanship

All of our knives are made using true damascus steel, hand forged by combining layers of different steels. These layers give unique and beautiful patterns on the blade. The layers are joined by heat treatment and hammering metallurgically. It increases the hardness of steel and gives the knife razor sharp edge and durability to hold the edge for a longer time.

Once the blade is ready, then it goes into assembly. You can find a range of handle materials like wood, bone, buffalo horn, sheep horn, stag deer antler and resins. These are assembled by hand. These custom made knives are perfectly balanced for superior handling.
